but work on Sunday because of the electricity shortage. At least twice a week there is no current in each quarter of the city.

7. Since about 1951, a new hydroelectric plant has been under construction about 800 -1000 meters west of Stara Zagora and 100-150 meters south of the Stara Zagora-Chirpan highway. The installation consists of three or four 2-story buildings. The power plant is built underground. According to official announcements, this power plant is to be completed before 1955 and to have a capacity of 30,000 kilowatts.

,	Comments:		
1.		the antenna pole is about 70-80 meters high.	25 X 1
2.		the area is surrounded by wire entanglements.
